DETAILED ACTION

Election of Species

Applicant's election without traverse of claims 1-8, readable upon the species depicted in Figs. 7-9 in the reply filed on 06/13/2005 is acknowledged. Applicant canceled claims 9-33.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claim 3 is objected to because of the following informalities:

Claim 3, line 3: Change "said first XOR" to -- said XOR --.

Claim 8, line 2: Change "the at least" to -- at least --.

Claim 8, line 3: Change "the at least" to -- at least --.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the references of record neither reveal nor render obvious a data inversion circuit using bit differences and parity signals in the claimed manner.

Art Unit: 2819

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,735,733 to LaRosa discloses parity bits and a XOR gate. U.S. Patent 5,915,082 to Marshall et al provides internal and external parity bits. U.S. Patent 5,881,076 to Murray shows a comparator having parity bits and XOR gates.

This application is in condition for allowance except for the following formal matters:

- 1) Correct claim 3.
- 2) Correct claim 8.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
